

COMPLEXITY SIMPLIFIED. MISSION AMPLIFIED.

CORPORATE OVERVIEW

Sabel Systems is a leader in digital engineering, digital twin solutions, and connected digital thread for the Department of War and federal agencies. We deliver purpose-built capabilities that simplify complex acquisition, sustainment, and mission challenges, enabling our customers to move faster, spend smarter, and stay mission-ready.

WHO WE ARE

Sabel brings together innovative engineers, solutions architects, and program managers with deep experience cutting through complexity to speed time to mission value. We integrate advanced technology into the most demanding environments, building secure, scalable platforms grounded in Model-Based Systems Engineering (MBSE) that help our customers understand what happens next before it happens.

WHO WE SERVE

We partner with the Department of War, federal agencies, and civilian organizations to deliver digital solutions that improve mission performance and operational efficiency. Our customers include the U.S. Air Force, U.S. Army, U.S. Navy, U.S. Marine Corps, U.S. Coast Guard, and U.S. Space Force. Our work spans the full range of mission environments, from labs and test ranges to production lines, sustainment depots, manufacturing facilities, and acquisition offices. These engagements are backed by trusted, long-standing relationships aligned with national priorities.

OUR PRODUCTS and SOLUTIONS

97Helix

97Helix brings together acquisition, sustainment, and mission operations into one unified platform. By centralizing lifecycle data under a single pane of glass and leveraging purpose-built ontologies, it creates a flexible, configurable environment for seamless collaboration and mission execution.

Spacestation

Spacestation, powered by Sabel's award-winning 97Helix technology, provides Space Force-affiliated organizations with a turnkey Digital Engineering and Transformation platform. Our multi-cloud hybrid solution provides a cost-effective environment for programs to go fully digital faster.

Code Foundry

Code Foundry is a DevSecOps solution for defense acquisition, embedding security, compliance, and testing throughout the pipeline. It supports virtual hardware, COTS, and real-time dashboards to accelerate secure software delivery.

TDPWerx

TDPWerx enables automated validation of technical data packages, accelerating programs through acquisition while maintaining lifecycle readiness. It addresses the inefficiencies of manual validation across thousands of parts by improving consistency of data quality at scale, reducing cost and delays from production to sustainment.
