

the **SYSTEM** that **BUILDS** the **SYSTEMS**

SPACESTATION CAPABILITIES

Collaboration & Project Management

Reduce Cost | Remove Barriers | Scalable Growth
Active users collaborating towards common missions;
Commands, PAEs, Government Agencies, FFRDCs,
and Industry.

Modeling, Simulation & Analysis

Integrate Diverse Tools | Critical Decisions
Maximize the use of graphical/mathematical models
and simulations to develop data as a basis for making
managerial or technical decisions.

DevSecOps

Improve Processes | Remove Delays
Providing deployable CI/CD Pipelines to
automate the software development lifecycle.

Requirements Management

Rapid Solutions | Produce Results
Rapidly adopt solutions to gather requirements across
teams and manage projects.

Data Interoperability

Reduce Risk | Increase Resilience
Identify gaps, mitigate threats, public and private data
sources with commercial (AI/ML) tools.

Spacestation, built on Sabel's award-winning 97Helix™, provides Space Force and affiliated organizations with a turnkey Digital Engineering and Agile Transformation platform. Our multi-cloud, hybrid solution provides a cost-effective environment for Programs to go fully digital faster, with access to market-leading Collaboration, Modeling Simulation & Analysis (MS&A), Model Based Systems Engineering (MBSE), Program/Project Management, and Software Development capabilities.

The platform is currently hosted at Impact Level 5 (IL5 - Controlled Unclassified Information) with IL6 (Secret Collateral) and Top-Secret SCI coming online soon. Accessible by Common Access Card (CAC) or External Certification Authority (ECA), Government end users and Industry/Academia/Other Federal Agency partners can work and collaborate seamlessly in Spacestation. And your certificate moves with you into the cloud, enabling Single Sign On and the ability to access other .mil resources requiring your certificate - directly from Spacestation.

Lauded by third-party evaluators as "one of the best digital engineering platforms in the DOD", we are proud to show you the limitless possibilities of Spacestation and Sabel Systems. Our GSA-administered, sole-source IDIQ contract vehicle provides a flexible and convenient means to quickly put Spacestation to work for your team.

Spacestation is sponsored by SSC/SYD 81/TIF

Successful digital transformation means that all your systems can exchange and make use of information.

That focus on interoperability guides our strategy, product development, business partnerships and solutions architecture so that you can adopt the leading technology swiftly and securely.

Spacestation is the Space Force Digital Engineering and Agile Transformation product, providing users with the support, services, and tools needed for success. This turnkey environment is available at the speed of now via a multi-year Sole-Source IDIQ contract. Spacestation services include training and domain expertise to enable your team with the knowledge, skills, and abilities to realize the potential of these advanced technologies.

Spacestation is a Sabel Systems solution. Our 2020 Tibbetts award-winning 97Helix solution has been deployed to all five services at all classification levels and is hosting hundreds of different COTS, GOTS, and locally created custom solutions.
